Methods of Communication

Hypercare has integrated various features to enable users to communicate with their preferred method (*messaging, voice call, email, pager*). Please note that these methods will only available if the recipient has shared their full contact information on the app.

Hypercare Messaging

Hypercare allows users to send direct messages to any member of their organization in an easy and efficient manner. Users can send priority messages, clinical images, clinical documents, and medical consults. This feature provides users with the flexibility to communicate on-the-go.

Creating a Group Chat

Hypercare allows users to create and manage group chats with any members of their organization thereby, allowing users to better communicate and collaborate within interdisciplinary teams.

Step 1

Open the Hypercare app and tap on the **"Chats"** icon on your mobile device.

Hypercare ? Support Jun 30 Sent a picture Kim Briggs Jun 12 201 (0) Chats Locating Task Settings

Creating a Group Chat

Step 3

Type in the search bar **OR** scroll through your list of contacts and tap on the users that you would like to start a chat with.

Once you have selected the user(s) that you would like to start a chat with, tap on **"Start"** in the top right corner.

Please note: Users can tap on one user to start an individual chat **OR** tap on multiple users to start a group chat.

Troubleshooting Tips

Q: I am apart of a group chat however, I am unable to remove a member from the chat.

A: When a user creates a group chat, they automatically assume an Admin role and have the power to promote member(s) to admins, demote member(s) from admin, and remove member(s) from the chat. If a user is not an admin of the chat, they can only add member(s) to the chat.

Priority Messaging

Users can send urgent messages to anyone in the organization,, allowing members to prioritize tasks and work more efficiently. Priority messages appear as a **yellow** message under chats and are accompanied by an **audible alert**. *If the recipient has the chat open when the message is sent, they will not hear the audible alert*.

Step 1

Open the Hypercare app and tap on the **"Chats"** icon on your mobile device.

Troubleshooting Tips

Q: I was sent a priority message but I did not hear the audible alert

A: To ensure that you do not miss priority messages, please edit Hypercare Notifications in your mobile device's Settings to **"allow critical alerts"** and **"allow notifications"**.

Sending Clinical Photos

Hypercare allows users to send and receive clinical photos over the app's messaging feature. Users can either take a photo in real-time or select from their mobile device's/computer's photo gallery.

Step 1

Open the Hypercare app and tap on the **"Chats"** icon on your mobile device.

Sending Clinical Documents

Step 2

Tap the appropriate chat or create a new chat.

Tap on the "+" icon and and select "**Documents**" from the pop-up menu.

Sending Clinical Documents

Step 3

Select the appropriate document and tap on **"Done"** located on the top right corner of your screen.

Your document will be attached to the text box where users may also type a message. Tap on the arrow icon to send the message.

Sending a Medical Consult

In today's modern healthcare system, it can be difficult to communicate with various members of the healthcare team in order to request for patient consults. Hypercare allows users to directly request consults in an easy and efficient manner.

Step 1

Open the Hypercare app and tap on the **"Chats"** icon on your mobile device.

Pager

Hypercare allows users to communicate with members of the organization through a paging system. Those who use pagers, should input their cell phone or pager number on Hypercare. For users who do not have a pager, pages will be received as an **SMS message** on their mobile device. Similar to a pager, the SMS message will show the sender's name and prompt the recipient to call the **"Callback Number"**.

Pager

Step 1

Open the Hypercare app and select on the "**Contacts**" icon on the bottom toolbar.

Step 2:

Locate and select the member which you would like to contact, their profile page will appear.

Select the *radio* icon if present to send a page.
